 - SAPUI5
-

TRAININGS

6 Week Training

Sebiz Institute (May 2017 - July 2017)

I have had a 6 weeks internship in php technology at Sebiz institute in Chandigarh where I built an ecommerce website integrated with Mysql.

6 Month Internship

Avaptech Solution Pvt Ltd (July 2018 – Dec 2018)

I am having my 6 Month internship in Avaptech solutions where I came to learn about different scripting languages along with php like jquery, javascript. That's when my interest grew more towards Laravel framework. And on top of all sitting with company colleagues I came to know about how to face real time challenges.

JOB EXPERIENCE

Accenture Solution Pvt Ltd (Sep 2019 - Present)

Position – Software Engineering Associate

I am currently serving as software engineer in the organisation for 2 years. I belong to an entity ATCI (Advanced Technology Centres, India). I have got opportunity to work in two projects. Both were in different technologies.

Axfood was my first project which was built in Laravel technology. I was working as full stack here. Currently, I am working in VMS project which is in SAPUI5 technology and I am working as front-end dev here

PROJECTS

AxOne Project (Accenture) (Jan 2020- Mar 2021)

AxOne was a retailing project about managing the store catalogue and products of the retail company AxFood based in Germany. The application was built mainly in Laravel. I was working as a full stack here managing both frontend and backend of the application. But other than Laravel, it was mix of all web technologies HTML, CSS, Javascript, Ajax/Jquery, Bootstrap and database was created in MySQL.

My job role was to build the web pages of the Admin Panel where we add the products, catalogue, user listing, feedback and various other modules in the backend and manage them in the frontend part of the application. Some various Laravel Features that I have used are as : Authentication, Blade Templating, Migrations, Eloquent, Factories, Database Seeder, Modularity (Admin Panel), Resource and routing and Middleware.

Visitor Management System VMS (Accenture) (Mar 2021 - Present)

In the next project, I have got cross trained to a completely different technology i.e. SAPUI5. My key role was to develop/maintain a web application in SAP ui5 platform under the guidelines of Fiori. There are two phases of project **VMS EC** (live) & **VMS Neo** (developing stage).

Initially I got aligned to VMS EC where the application is live and my job role was to work on the production issues, production rollout, bug fixes and add on functionality whatever business requires. Later, I have got opportunity to work in VMS NEO (Jan 2022) where we are developing the same application in latest version and different way than the EC. We discuss the plan of building different modules & architecture of the application from the scratch within team and in sync with client.

ABOUT ME

I am a generic person with a goal in my life. My eagerness makes me a hard worker, anxious to achieve my objectives. If I choose to bring an assignment, it's difficult to back me off. I have attitude of an explorer and possess strong wanderlust. I have the young new energy to learn and work with all my dedication.
